

AIRCRAFT MAINTENANCE DOCUMENTS

Dec 01, 2020

[Aircraft Maintenance Documents](#)

To summarize, the basic requirements for aircraft maintenance documentations are the same. Whether it is a Cessna 150 or a Airbus 380 The method of meeting those requirements may be different depending on the type of operation. It may be a simple airframe, engine, propeller log book, or an air carrier's maintenance record system. A description of the work performed, date the work was performed and the signature with certificate number and type are always required.

This digital Cessna 150 annual or 100-hour inspection checklist can be utilized by Cessna 150 aircraft owners to complete federally-mandated aircraft maintenance checks and properly document their inspection process. With a mobile device, pilots can use this checklist via iAuditor to do away with pen-and-paper, and conduct comprehensive inspections that are compliant with the FAA.

[What Documents Must Be on Board an Aircraft? | USA Today](#)

7.8.3.1 Maintenance records are important documents that show if the aircraft is being maintained properly. The records should clearly indicate the status of applicable mandatory continuing airworthiness instructions, or if the aircraft is current with its maintenance programme requirements. Maintenance records can show if the aircraft has received all its required overhauls or any component ...

[Aircraft Maintenance - SKYbrary Aviation Safety](#)

Maintenance planning documents (MPDs) are provided by aircraft manufacturers to describe the repetitive tasks that are required to maintain their aircraft. Maintenance planning engineers use the MPD information to develop operator maintenance programs (OMPs) that are then submitted to the relevant aviation authority for approval.

[Maintenance Programme - SKYbrary Aviation Safety](#)

People with a category A license are allowed to certify certain maintenance tasks as per the internal company approval issued by the Part 145 aircraft maintenance organization. The Part 145 regulation lists typical tasks which type A certifying staff can normally certify. This would include things like wheel replacements, replacements of bulbs, filling up oil and hydraulic fluid, and several other things. An A rated person would normally not certify for defect rectification tasks ...
