In short, an approved maintenance program is a list (in the form of a long table) of all maintenance tasks which need to be performed on an aircraft from time to time. In other words, based on the AMP an airworthiness engineer knows exactly what tasks need to be performed after an aircraft reaches a certain point in life, be it calculated based on calendar age, flight hours of flight cycles.

Aircraft Maintenance is intended to keep the aircraft in a state which will or has enabled a certificate of release to service to be issued. A hangar environment may be available but is often not necessary. The reasons for carrying out maintenance are neatly summarised by [Lam 2002]: Aircraft safety – airworthiness at its heart; Keep aircraft in service – Availability, which is of key ...
