Well, in my reading classroom (where you take tests), there are 3 computers next to eachother. All three are used for taking tests. Some of my friends and I sometimes sat next to each other and took the same tests. We noticed the the choices were randomized (what choice would be A one time, could be C the next), but we were about to look at the text and still cheat. This method, however, was ...

Answer Key to Unit 6 Assessment 1. The money multiplier, which is calculated as one divided by the required reserve ratio, equals 10.0 (1/0.10) in this instance. The money supply would grow by \$10 billion, which is the maximum resultant change. The condition under which that change occurs assumes that all banks in the entire banking system are generating loans from their excess reserves. 2. M1 ...
