Benchmark assessments, also frequently called interim assessments, are intended to be something between formative and summative assessments. They are fixed assessments, evaluating students against specific grade-level standards and learning goals rather than simply taking a quick pulse of understanding. However, unlike summative assessments, the purpose of benchmarking is

Benchmarks Can Inform Assessment Strategy. If assessment is about judging someone's performance, then it makes sense that we would be able to somehow measure that performance. One way to measure performance is by comparing it to what is widely accepted as a reasonable standard. Here's an example. Let's say that the across all child-care centres in Australia, the average number of days ...
