Calculus is a Mathematical model, that helps us to analyze a system to find an optimal solution to predict the future. In real life, concepts of calculus play a major role either it is related to solve the area of complicated shapes, safety of vehicles, to evaluate survey data for business planning, credit cards payment records, or to find how the changing conditions of a system affect us, etc ...

[CV12 Chap 6 solns Bts](#)

Section 3-3 : Differentiation Formulas. In the first section of this chapter we saw the definition of the derivative and we computed a couple of derivatives using the definition. As we saw in those examples there was a fair amount of work involved in computing the limits and the functions that we worked with were not terribly complicated.
