[Cells To Civilizations The Principles Of Change That Shape Life Enrico Coen](#)

But geneticist Enrico Coen, in his pioneering new book Cells to Civilization, reveals that these transformations revolve around shared core principles and manifest the same fundamental recipe. Coen blends provocative discussion, the latest scientific research, and colourful examples to demonstrate the links between these critical stages in the history of life."--Chemicals & Chemistry

"Cells to Civilizations explores the extraordinary transformations that are the basis of life. Simple cells evolve into complex animals. Single cells develop into a human being. Newborns learn how to behave in society. Societies create cultural institutions. Coen shows that a small number of principles applies to all these transformations. This book provided me with a real feeling for the unity of life. It gave me a glimpse of that mysterious and awesome circle through which evolution ...

Cells to Civilizations is the first unified account of how life transforms itself--from the production of bacteria to the emergence of complex civilizations. What are the connections between evolving microbes, an egg that develops into an infant, and a child who learns to walk and talk? Award-winning scientist Enrico Coen synthesizes the growth of living systems and creative processes, and he ...
