Chiropractors and orthopedists, also known as orthopedic surgeons, are both highly educated professionals who specialize in issues of the musculoskeletal system. In layman's terms, they're trained to alleviate the pain in muscles, tendons, ligaments, and bones. One would typically visit either a chiropractor or orthopedist if they were experiencing:

[Home | Chiropractic Orthopedics and Rehabilitation](#)

Orthopedics and chiropractic both deal with musculoskeletal issues, but chiropractic usually takes a more holistic approach. Orthopedics is often involved in more surgical solutions whereas chiropractic looks at the body as a whole and treats the individual for overall health and well-being, using more targeted approaches for treatment as needed. However, chiropractors and orthopedic surgeons ...
