[Chiropractic : the science of specific spinal adjustment ...](#)

Chiropractic therapy is a form of medicine that focuses on the diagnosis and treatment of mechanical disorders of the musculoskeletal system, especially the spine. Chiropractors use hands-on manipulation to provide treatment for many conditions, including neck and back pain, headaches and migraines, pain in the extremities and for injuries.

[The Chiropractic Adjustment - Dr. Philip Greenwood ...](#)

Chiropractic adjustment is a procedure in which trained specialists (chiropractors) use their hands or a small instrument to apply a controlled, sudden force to a spinal joint. The goal of this procedure, also known as spinal manipulation, is to improve spinal motion and improve your body's physical function.

When a chiropractor re-aligns the vertebrae in your spinal column, he or she removes the interferences between your brain and body so they communicate more effectively. That's why adjustments help your back feel better, but they also help everything work better. These adjustments can be simple, but profound.

The chiropractic profession has traditionally called it "spinal adjustment"; the osteopathic profession has used the term "high velocity low amplitude (HVLA) thrust manipulation"; and physical therapists have called it either "spinal manipulation" or "grade V spinal mobilization." Descriptions of the actual spinal manipulative techniques performed by the various professions have also been extremely diverse and often based on each profession's theoretic constructs and ...

Chiropractic care is often associated with treatments that affect the spine and nervous system. Many people fail to realize that there is more associated with this field of care than a simple adjustment on your vertebrae. The different chiropractic modalities can play a big role in your overall treatment and care. These additional services can make the difference between a successful treatment ...

[Does Spinal Manipulation Work? - www.PainScience.com](#)

Prior to executing a Specific Spinal Adjustment, the Chiropractor will typically do an assessment of the nerve and blood supply in the treatment area, as well as look at the bone and muscles themselves. This will help the Chiropractor determine where and how to adjust. Specific spinal adjustments also known as Spinal manipulative therapy is a physical treatment used by Chiropractors to aid the ...

[Chiropractic - Wikipedia](#)

British science writer Simon Singh was sued in 2008 by the British Chiropractic Association for criticizing spinal adjustment for children with conditions like asthma and ear infections, calling it "bogus" and pointing out the lack of evidence. The BCA withdrew its lawsuit two years later, having suffered a public relations disaster. In 2012, the Guardian published an interesting follow-up,

[A Specific Spinal Adjustment is the Latest Development in ...](#)

The practice of chiropractic focuses on the relationship between structure (primarily the spine) and function (as coordinated by the nervous system) and how that relationship affects the preservation and restoration of health.

[SIGNED & DEDICATED SCIENCE of SPINAL ADJUSTMENT ...](#)

Chiropractic was defined by D.D. Palmer as "a science of healing without drugs." About 60,000 chiropractors currently practice in North America, and, worldwide, billions are spent each year for their services. This article attempts to critically evaluate chiropractic. The specific topics include the ...

[Spinal adjustment - Wikipedia](#)

Interestingly enough, there are dramatic differences between chiropractic adjustment vs. spinal manipulation. Ultimately, manipulation tends to target the entire spine, but an adjustment focuses on a specific area or areas of the spinal region. Typically manipulation is used to provide short-term pain relief while a chiropractic adjustment offers long-term benefits. What is a Chiropractic ...

[The Benefits Of Spinal Adjustments In Chiropractic](#)

Chiropractic spinal adjustments can realign joints and vertebra and reduce distress to your nervous system. What are Chiropractic Spinal Adjustments? "Adjustment" is a common term used to describe the therapeutic manipulation of the body that uses controlled pressure, pull, and force at specific joints to alleviate pain.

[What Happens at a Chiropractor & What to Expect | MaxLiving](#)

Chiropractic as a profession began in 1895 when its founder, Daniel David Palmer, "adjusted" the spine of a deaf janitor and claimed to restore his hearing. Spinal manipulation was not an unknown treatment in 1895, and Palmer never claimed to be the first to use manipulation for the cure of disease. He did claim, however, to be the first to use specific contacts as short-leverage points ...
