Help setting up a Cisco 871 Router for Home... Hello Andrew, Alain provided you entire configuration of what you requested, but I think that you also need to configure NAT to be able to access internet from LAN PCs. Reason for this is that you obtain WAN IP address and default route from ISP, for example: IP: 10.0.0.1. Mask: 255.255.255.0. Gateway: 10.0.0.254. But your ISP assume that you have ...

Configuring the Cisco 851W or 871W: Standard IOS. The Cisco 851W router is a relatively low cost multipurpose device (\$292 is the lowest price), which can support virtual wireless LANs separated by firewalls. Although the Cisco 871W can do more things, it is in the \$500 to \$700 range, depending on the software feature set you want—and that may be a little too expensive for a home router or ...

Default Configuration for 871 Routers. The Cisco 871 routers come with some preconfigured parameters (IP addresses etc.) which might be in conflict with your current network topology. What I suggest is to erase the factory's default startup configuration before you begin configuring your router for the first time. This allows you to start with a clean state and configure the router with all ...

Cisco 871 Simple Config. Introduction. I've used IPCop for ages. It rocks, but runs on a PC and so takes up space and uses a fair whack of power, and needs a separate LAN hub and wireless AP. I use Cisco hardware at work, and I had the chance of a 871W to use. I use Virgin Media, so have one DHCP-issued IP address, and I wanted a simple config with a LAN with DHCP and a WPA-PSK wireless LAN ...
