Cisco Advanced Asa Firewalls Inside Out

Cisco Advanced ASA Firewalls Inside-Out BRKSEC-3660 Sasa Rasovic Incident Manager, Cisco PSIRT

Patch released for Cisco ASA firewall vulnerability ...

You do not want the ASA to send the management traffic out to the inside network; it will never return to the inside interface IP address. The route lookup option lets the ASA send the traffic directly to the inside interface IP address instead of to the inside network. For traffic from the VPN client to a host on the inside network, the route lookup option will still result in the correct ...

Troubleshooting ASA Firewalls - alcatron.net

The ASA connects the same network between its interfaces. Because the firewall is not a routed hop, you can easily introduce a transparent firewall into an existing network. The following figure shows a typical transparent firewall network where the outside devices are on the same subnet as the inside devices.

Solved: Active ftp, ASA 5510 - Cisco Community

By default a Cisco ASA will allow all traffic from a higher-security interface (Inside) to a lower-security interface (Outside). Provided that you have set your security levels correctly then this would render your current outbound access-list completely redundant. I suggest you give this Cisco article a good read as it explains your current woes.
