Features include: support for project creation and managed build for various toolchains, standard make build, source navigation, various source knowledge tools, such as type hierarchy, call graph, include browser, macro ...

[About the Tutorial](#)

Eclipse parses this output to find header directories, but it can't resolve include directories of the form /c/blah without using cygpath. There is a heuristic that Eclipse Build Output Parser uses to determine whether it should call cygpath , but for currently unknown reasons the ESP8266\_RTOS\_SDK configuration doesn't trigger it.
