Science and technology in China have developed rapidly during the 1990s to 2010s. The Chinese government has placed emphasis through funding, reform, and societal status on science and technology as a fundamental part of the socio-economic development of the country as well as for national prestige. China has made rapid advances in areas such as education, infrastructure, high-tech ...

And the Netherlands is home to many more technological innovations. Think, for instance, of the use of sustainable energy. Many wind mills are built with Dutch knowledge, and Nuna, the world's fastest solar-powered car, was designed by technology students in the Netherlands. In addition, one of the market leaders in navigation systems, TomTom, has its roots in the Netherlands.
