Strategic planning includes all measures taken to provide a broad picture of what must be achieved and in which order, including how to organise a system capable of achieving the overall goals. Strategic planning often is done pre-event, based on previous experience and expertise. The strategic planning for disasters converts needs into a strategic plan of action. Strategic plans detail the ...

strategic planning and action planning, both of which are dealt with in detail in separate toolkits. It also provides some ideas about techniques to use in planning. It should provide a fairly inexperienced planning team in any organisation with a clear picture of what planning should involve, and of how planning links to monitoring and evaluation. A further toolkit deals with monitoring and ...

Environmental Factors in Strategic Planning. For any business to grow and prosper, managers of the business must be able to anticipate, recognise and deal with change in the internal and external environment. Change is a certainty, and for this reason business managers must actively engage in a process that identifies change and modifies business activity to take best advantage of change. That ...

A regional approach may be relevant in three situations. First in the management of land-use conflicts or the evolution of urban centres, in their relationship to one another. Second, in the delivery of programmes by State or National agencies. Third, in the promotion of economic development There will often be situations in which these three areas of regional action should be linked. This ...
