Systems psychology is a branch of psychology that studies human behaviour and experience in complex systems. It received inspiration from systems theory and systems thinking, as well as the basics of theoretical work from Roger Barker, Gregory Bateson, Humberto Maturana and others. It makes an approach in psychology in which groups and individuals receive consideration as systems in ...

[Psychology: Work and Organizational Psychology - Master's ...](#)

The American Psychological Association defines psychology as "the study of the mind and behavior." In a sense, this is a topic that was contemplated by the Greek philosophers of ancient times, as well as one that sits at the heart of all the world's major religions. However, the modern study of psychology as a science is relatively new, dating back to the 19th century work of pioneers of ...
