14. Newton's third law of motion is also known as the LAW OF ACTION – REACTION. 15. Newton's third law says that every time there is an ACTION force, there is also a REACTION force that is EQUAL in size and acts in the OPPOSITE direction. 16. Newton's third law states that forces must ALWAYS occur in PAIRS. 17. Listed below are ACTION forces.

Key Concept Newton's laws of motion describe the relationship between forces and the motion of an object. What You Will Learn • Newton's first law of motion states that the motion of an object will change only if unbalanced forces act on the object. • Newton's second law of motion states that the acceleration of an object depends on the object's mass and on the force exerted on the ...

Newton's second law is closely related to his first law. It mathematically gives the cause-and-effect relationship between force and changes in motion. Newton's second law is quantitative and is used extensively to calculate what happens in situations involving a force. Before we can write down Newton's second law as a simple equation that gives the exact relationship of force, mass, and ...
